SKILLS

- Brand oversight
- Project Management
- Data Analysis
- Business Development
- Linux expertise
- Unix and Linux-based tools
- Cloud Solutions Architect

ABOUT ME

Efficient at speeding up and automating aspects of the processes of developing, testing and releasing software, allowing for the continuous delivery of software and software updates, whilst working closely with internal and external business stakeholders to achieve strategic goals.

I am an advocate for continuous improvement across the different areas of the Tech and Product department and I strive to collaborate with colleagues from different Engineering Platforms to make it happen.

I drive initiatives from start requests to implementation before assessing results and identifying optimization opportunities.

WORK EXPERIENCE

Jan 2018 - Present

*Freelancer, Open
Source Developer*

- Created innovative Web Apps React and Bootstrap.
- Developed Designs and content for web pages following branding guidelines and best practices.
- Completed website backups and disaster recovery planning, reducing data hack or loss risks.
- Integrated advanced UI principles for user-centered design.
- Delivered clean, concise code bases in line with project scope and without performance issues.

Oct 2019 - Jan 2021

*Website Administrator &
Business Developer at
InvestAfricamedia LTD*

- Ensured web server systems ran smoothly and efficiently through periodic testing and monitoring.
- Conducted in-depth fault analysis into website malfunctions to identify problems, make action plans, and implement intelligent solutions.
- Created advanced websites and software solutions, implemented across multiple projects both commercial and Open Source.
- Analyzed website and web server performance, making recommendations for updates based on privacy and security best practices.
